

# AC-3 Cleaner

**Quick acting cleaner for masonry and stone**

AC-3 Cleaner is one of the safest and most effective all purpose acid cleaners on the market. Formulated with a comparatively safe acid, strong detergent and solvents AC-3 Cleaner provides fast, 3-way cleaning action. It penetrates deeply - dissolving and dislodging dirt, oil, grease, etc. from brick, pavers, stone or concrete. Stains are bound and trapped into a foam which rises to the surface where it is rinsed away ...for easy cleaning and removal. AC-3 Cleaner has a pleasant, clean odor and does not emit harmful or corrosive fumes\*.

*Renew aged brick - Cleans efflorescence and mineral deposits*

Coverage will vary depending on density, porosity, texture, surface absorption, weather, time solution left on surface and application method. Used as directed, Phosphoric Acid Cleaner will cover approximately 250 - 1,000 square feet per gallon.

- Removes efflorescence, salts, dirt, grease and mineral deposits from masonry such as:

Brick	Concrete
Stone	Marble
Pavers	Ceramic Tile
Terazzo	Slate

- Cleans and renews old, weathered and stained concrete and masonry buildings
- Etches and cleans concrete floors in preparation of painting
- Prepares surface to receive weatherproof treatment or coating
- Removes cement drippings and waste from new surfaces
- Removes grease, dirt and oil from metal surfaces
- Brighten and cleans off oxidation
- Cuts zinc coating and film.

#### Etch concrete before applying epoxy

*Removes grease & dirt which impedes bonding  
Allows deeper penetration of epoxy to maximize bond and prevent lifting of coating.*

#### Clean efflorescence off pavers & brick

*Removes mineral build up & staining on masonry  
Breaks down years worth of dirt, oil and grime  
Gentle on stamped concrete & colored pre-cast*

#### Neutralize and remove rust from steel

*Converts iron oxide rust to allow easy removal with wire brush or wire wheel*

*Stops or slows the spreading of rust*
